

Please postpone the June 2nd meeting and allow more public input to the issue of more deregulation of the airwaves and ownership of the media. The airwaves are owned by the public and should be open to public scrutiny at all times and not be controlled by a few very rich and powerful media moguls who are only interested in their own gain and/or political influence. We need balance and much more honesty in government and all of its components. To think that the public is not aware or even cares about these issues is a very short sighted and narrow view of its depth of understanding. If pushed much further, voters are likely to oust many of our elected officials in upcoming elections, both on a national level and a local level. We do follow what is happening and we do care. Give us a chance to hear public debate about the secret decisions already made and ready for 'vote'. We need to maintain our democracy and open society hearing a multitude of voices and opinions in all matters.
